Re: Backflow Device Inspection Forms

The City of Texas City Public Utilities Department is responsible for maintaining records of all backflow devices for the Texas Commission on Environmental Quality. These forms are to be completed and submitted by the contractor for each device installed. These forms will be required by the Inspection Department prior to the issuance of a Certificate of Occupancy.

If you have any questions, you may contact Gary Windham in Public Utilities at (409) 948-2436.
